

**Protocol for Cashew using
The Masinag Organic Fertilizer**

Watering

- a) Prepare 1% Masinag solution (1L of Masinag diluted to 100L of water)
- b) Water trees with the prepared solution at about 5L per trees, if big and 3L if small
- c) Water trees with 1% Masinag solution (1L of Masinag diluted to 100L of water) every month for 3 consecutive months.
- d) In every application we need 150liters solution (1L of Masinag diluted to 100L of water)

Foliar Application

- a) Prepare 1% Masinag solution at 1:100 dilution (1L of Masinag diluted to 100L of water)
- b) Spray the prepared solution directly to the leaves, branches and roots
- c) Spray Masinag solution at 1:80 dilution (1L of Masinag diluted to 80L of water) once a month until flower and fruits are visible.

Timing of Application:

| Month | Dilution | How |
|--------------------|--|--|
| July 15, 2016 | 1L of Masinag diluted to 100L of water | Spray to the leaves, brances and roots |
| August 15, 2016 | 1L of Masinag diluted to 100L of water | Spray to the leaves, brances and roots |
| September 15, 2016 | 1L of Masinag diluted to 100L of water | Spray to the leaves, brances and roots |
| November 15, 2016 | 1L of Masinag diluted to 80L of water | Spray to the leaves, brances and roots |
| December 15, 2016 | 1L of Masinag diluted to 80L of water | Spray to the leaves, brances and roots |
| January 15, 2016 | 1L of Masinag diluted to 80L of water | Spray to the leaves, brances and roots |

NOTE:

- 1. You need a 150liters of Masinag Solution in every application for 50 trees or 3L/ tree.
- 2. You can spray after or before the flowering **BUT NOT** during the Flowering stage.
